

# Mustafa Umar

Full Stack Web Developer | Next-MERN Developer

Chaklala Rawalpindi, Pakistan | mustafaumar2001@gmail.com | +92 3245283434 | <https://resume-mustafa.vercel.app/>

Web Developer and Software Engineer with over 5 months of hands-on experience in Next.js and React.js. Proficient at building responsive and high-performance web applications using modern technologies, including Next.js, React.JS, Tailwind CSS, and MongoDB. Dedicated to building dynamic, user-friendly interfaces and enhancing web performance

## SKILLS

- **Frontend:** Next.js, React.js, HTMLS, Tailwind CSS, CSS3, TypeScript, JavaScript (ES6+), DaisyUI, Bootstrap
- **Backend:** Next.js, MongoDB, MySQL
- **Version Control:** Git
- **Collaboration Tools:** GitHub, Vercel
- **Other Skills:** UI/UX Best Practices, Performance Optimization

## EXPERIENCE

### KKWoodTech, Rawat— T raditional F ull-Stack Web Development

Feb 2023

- Individually created a visually appealing ecommerce website that enhanced user experience, utilizing HTML, CSS, JavaScript, and Bootstrap.
- Developed backend functionalities using PHP, enabling dynamic content management and multiple CRUD operations.
- Managed databases with MySQL and JSON, ensuring efficient data storage, retrieval, and overall website performance.

### Hexler Tech NSTP, NUST — React.JS & Next.JS Web Development Internship

October 2024

- Gained hands-on experience in frontend development using React.js and Next.js, building dynamic and responsive web applications.
- Designed and developed a personal resume website, showcasing proficiency in modern web technologies.
- Learned and implemented Tailwind CSS, creating visually appealing and responsive layouts with streamlined styling techniques.
- Explored MongoDB, understanding the basics of database management and integrating it with web applications for data storage.

## Projects

### Responsive Portfolio — Fully Responsive Next.js Innovative Portfolio

- Built a personal portfolio using Next.js, Tailwind CSS, DaisyUI, Framer Motion.
- Created a responsive and interactive user interface for a seamless experience.
- Implemented state management with Next.Js features for efficient performance and designed a clean and modern layout using Tailwind CSS and DaisyUI components.
- Optimized for mobile and desktop viewing, ensuring cross-device compatibility and incorporated smooth animations and transitions to enhance user engagement using Framer Motion.
- Ensured type safety and improved code maintainability by using TypeScript, reducing runtime errors and enhancing developer productivity.

### KKWoodTech — Ecommerce Website for Wooden Architectural solutions

- Designed and developed a responsive eCommerce platform tailored for selling wooden architectural products.
- Implemented a user-friendly interface with seamless navigation to enhance the customer shopping experience.
- Built a custom backend system using PHP for efficient product management, order tracking, and customer interactions.
- Integrated MySQL for secure data storage, ensuring smooth handling of product listings, transactions, and user accounts.

### Coders Cafe — Modern Web Application

- Developed a Next.js-based web application with a sleek and responsive UI for an enhanced user experience.
- Implemented Framer Motion to add smooth animations and interactive elements, improving engagement.
- Styled the interface using Tailwind CSS and DaisyUI, ensuring a modern and visually appealing design.
- Utilized TypeScript for type safety and improved maintainability of the codebase
